

PRECISION MACHINING EXPERTISE

Nissha Medical Technologies (NMT) has been the trusted end-to-end solutions partner in design, development, and manufacturing for global MedTech OEMs for over 30 years. In 2020, NMT added medical machining including assembly and over-molding of machined components to our vertically integrated list of capabilities. Although new to NMT, the recently acquired facility in Norwalk, OH has been offering full-service machining to medical OEMs for over 60 years, with an emphasis in lens polishing, lens grinding, and complex lens train assembly.

Swiss Style CNC Lathes

5 Axis Machining Centers

Laser Marking, Welding, Cutting

Metal Stamping and Forming

Tube Drawing, Bending, and Forming

Lens Grinding & Polishing

Lens Train Assembly for Rigid and Semi-rigid Endoscopes

Electrical Discharge Machining (EDM)

CNC Milling

Surface Finishing

Component Integration
